Meeting Room 1, 3rd Floor, IHPP, Ministry of Public Health*

1. Rehearsal presentation for International Association of Gerontology and Geriatrics (IAGG) Asia/Oceania 2015 Congress

Title: **Use of health services among Japanese long-stay seniors in Thailand**

Introduction: Currently, the Japanese older population in Thailand is significantly increasing as a consequence of promotion of long-stay tourism. It is expected to increase demand for health care services, and thus for human resources for health. The study aims to explore the characteristics of Japanese long-stay seniors, and to reveal current situation of use and future needs of health services among them.

Presenter: Ms. Yumiko Miyashita, International Trade and Health Programme(ITH), IHPP
